FOR IMMEDIATE RELEASE

Highway 121-Capell Creek Bridge One-Way Traffic Controls Start Tuesday, June 10th Motorists Should Expect Delays

NAPA COUNTY – The California Department of Transportation (Caltrans) will begin work to replace the Highway 121-Capell Creek Bridge in Napa County. The bridge is located on Highway 121 approximately 17 miles northeast of Downtown Napa.

The work is scheduled to start Tuesday, June 10th at 7 a.m. and be completed as early as mid-October 2014. The project will replace the existing Capell Creek Bridge, which has become worn over time, with a new single-span bridge.

To ensure public and worker safety during the work, one-way traffic controls will be in effect on the bridge and on the northbound and southbound approaches to the bridge on Highway 121 in northeast Napa County.

Normal construction hours are Monday through Friday from 7 a.m. until 5 p.m. Caltrans will notify the public if there are changes to these hours.

During one-way traffic controls, crews will alternate closures on northbound and southbound Highway 121 near the Capell Creek Bridge to allow one-lane of traffic to proceed at a time. During the traffic controls, one lane of traffic will remain open at all times.

Please slow for flaggers and construction crews. Motorists should expect delays and allow for extra travel time.
